**SoluSoft Integrates Character Recognition and Forms Processing Software for Greater Productivity**

*Solusoft Technologies Pvt. Ltd., has released the latest version of its Forms Processing Application .It has integrated Intelligent Character Recognition (ICR) and Magnetic Ink Character Recognition (MICR) Technology .The latest version will be launched soon in other parts of the world.*

/24-7PressRelease/ - AHMEDABAD, INDIA, March 21, 2008 - Solusoft Technologies Pvt Ltd, a leading provider of software and services, announced the availability of the latest version of its Forms Processing Application for the Asia-Pacific region. The SoluSoft forms processing software now features integrated Intelligent Character Recognition (ICR) and Magnetic Ink Character Recognition (MICR).

The new software product is significant because it offers government, enterprise, and financial users a single unified platform to easily input and process documents and banking checks. For financial customers who extensively use MICR, this will result in more effective detection of fraudulent acts and bad accounts. For all users, deploying this technology will ensure cost reduction and enhanced customer service.

Mr. Kiran Thakrar, CEO said, "This integration is a remarkable development by the SoluSoft R&D team, The Company plans to release the latest version in other parts of the world soon. Constant efforts & intensive research by the team has paid off." SoluSoft team keeps itself updated with latest developments in business process technology to ensure the delivery of state of the art solutions to its clients.

SoluSoft Technologies Pvt. Ltd is a leading Software Development and Service Company. Our intensive R&D facilitates Global 2000 businesses, Government customers and Outsourced Projects to unlock new levels of information integration, allows collaborative governance and provides knowledge-based decision-making to achieve new levels of performance.
