

SoluSoft announces the release of Enterprise Scanning Solution-i2Scan

By SoluSoft Technologies Pvt. Ltd

Dated: Apr 21, 2009

SoluSoft Technologies Pvt. Ltd. added a new solution in its product line-i2Scan. Loaded with powerful features, this is an ideal solution to cater the needs of bulk document scanning.

Solusoft Technologies Pvt. Ltd, a leading provider of software and services, announced the launch of Enterprise Scanning Solution-i2Scan. This is a complete scanning application for the enterprise.i2Scan is an easy-to-use business solution to enhance organization's productivity through its robust features.

Scanning has become an integral way of digitizing organization's activities. Software and services department of SoluSoft Technologies Pvt. Ltd. launched i2Scan in the first quarter of 2009. This is a comprehensive scanning solution capable of document scanning, data extraction, indexing and output generation. The application intelligently categorizes documents and batches. OCR, ICR and Barcode technology is embedded to enable intelligent data extraction from scanned images. This powerful feature enables recognition and document indexing. Output can be generated and exported in user defined formats. i2Scan has a special feature whereby eCTD submissions can be streamlined as well.

i2Scan is adaptable to meet a variety of organizations' needs. It operates in different modes to adapt to the user. Document Scanning, Indexing, Recognition and Output generation are all available in single, robust platform.

“Our goal is to design complete, efficient and effective solutions for various industries and government organizations. SoluSoft's emphasize is on quality and customer satisfaction. I2Scan is offered initially in Asian market with plans to release it world-wide soon,” said Mr. Kiran Thakrar, CEO of SoluSoft Technologies Pvt. Ltd.
